

BAY SERIES

Welded Boat Construction

AccessaTrack Gunnel - can handle any of your fishing accessories, easy to utilize and maneuver around the boat.

Reinforced Bow Support - provides rigidity, consistency and energy dispersion when hitting a wave!

Extra Thick Hull Design - GameFisher boats are hand formed out of the thickest aluminum on the market - making our boats the toughest in the industry!

6 Sturdy I-Beam Longitudinal Stringers - run the entire length of the boat and combine with transverse bulkheads to create torque boxes that provide each GameFisher boat with exceptional support of the running surface, which translates into a smoother ride!

Angled Power Bars - counteract the twisting action of the engine's weight and thrust, transferring this torque energy across the boat's entire hull.

Torque Boxes - formed by the I-beams and transverse bulkheads that are found throughout the lower hull section - provide superior strength and provide the smoothest ride on the water!

GAMEFISHER - BECAUSE THERE IS A DIFFERENCE!

GET UP ON PLANE MORE QUICKLY - USING LESS HP!

GameFisher builds boats for demanding fishing and hunting enthusiasts who appreciate performance, rugged construction, durability and big fish! GameFisher owners catch the biggest fish because their boats are built to get you to where the fish are. Places the competition's boats can't go. Nobody builds a tougher boat. NOBODY. And, no other aluminum fishing boat manufacturer will stand behind their product like GameFisher. You won't find this level of quality and commitment to durability, performance and fish-ability at the big box stores - and that's no fish story. Consistent hull performance in a GameFisher boat is achieved by their torque box's longitudinal stringer system. It is designed for maximum support of the running surface by directing the load and energy across the complete under-structure. Featuring six aluminum marine-grade I-beams running along the boat's length - it is combined with transverse bulkheads to produce torque boxes throughout. That's known as GameFisher tough! To get the smoothest ride possible - hull rigidity, consistency to the water surface and energy dispersion when hitting a wave are controlled by eight aluminum hat channel ribs tied to the longitudinal stringer system. Four aluminum lifting strakes in the hull give bow lift, improving overall maneuverability, while the reverse chine hull creates increased stability, faster on-plane performance and more responsive turning and handling. GameFisher - the best value for your money!

190 BAY

The incredible 190 Bay boat from GameFisher offers superior performance and ride, along with great fishability and overall comfort - all at a great price! The versatility of the 186 Bay will get you where you need to be fast and keep you dry along the way. This product offers ease of use for those new to the bay boat lifestyle while offering high-level performance and features expected by the experts. Choose the 186 Bay for the best value in the bay boat segment!
